

SYLLABUS MOBILE PROGRAMMING

1. Program General Data

1.1. University	„1 Decembrie 1918” University of Alba Iulia
1.2. Faculty	Faculty of Informatics and Engineering
1.3. Department	Informatics, Mathematics and Electronics
1.4. Area	Computer Science
1.5. Level	Undergraduate
1.6. Specialization	Computer Science

2. Subject General Data

2.1. Subject	Development Of Mobile Application		2.2. Code	CSE 304			
2.3. Course holder/ Lecturer	Lect. dr. Domșa Ovidiu						
2.4. Teaching Assistant's Name	Lect. dr. Domșa Ovidiu						
2.5. Year	III	2.6. Semester	I	2.7. Evaluation form (E – final exam/C-examination /VP)	E	2.8. Status (C– Compulsory, Op – optional, F - Facultative)	O

3. Course Structure (Weekly number of hours)

3.1. Weekly number of hours	4	3.2. course	2	3.3. seminar, laboratory	2
3.4. Total number of hours according to the curricula	56	3.5. course	28	3.6. seminar, laboratory	28
Time distribution:					Hours
Individual study using the lecture notes					50
Documentation (library)					50
Homework, Essays, Portfolios					50
Tutoring					-
Evaluation (exams)					28
Other activities.....					-
3.7 Total number of hours for individual study					108
3.9 Total number of hours per semester					178
3.10 Credits					6

4. Prerequisites

4.1. Curricula prerequisites	<i>Imperative and procedural programming Object Oriented Programming</i>
4.2. according to the general competencies	<i>Algorithms and data structures</i>

5. Conditions

5.1. Conditions to support teaching	<i>Room equipped with video projector/board.</i>
5.2. Conditions for supporting seminar/laboratory activities	<i>Laboratory – computers. Software: BorlandC, Internet acces.</i>

6. Competențe specifice acumulate (cele alese de titular din grila de competente)

Professional competences	<ul style="list-style-type: none"> - Introductory graduate level course with focus on mobile computing. Research in mobile computing straddles diverse areas such as operating systems, development platforms and programming languages. - Solve different problems using Java for Android and Swift for Apple devices.
Transversal competences	<p>Cognitive skills: acquisition of basic and specific knowledge about the concept of mobile computing; the ability to identify the applicability of the studied in real problems; understanding the need of using mobile Java and Swift programming when addressing problems from that perspective; acquiring basic knowledge on the concept of mobile applications.</p> <p>Affective skills: develop the capacity of analysis and understanding the highly complex real problems and effectively address it from an mobile process perspective. Team spirit: encouraging students to work in design, analysis and programming teams. Awareness of the importance of the knowledge and thoroughly study of Java and Swift utility in that's problems.</p>

7. Course objectives

7.1 General course objectives	<ul style="list-style-type: none"> - <i>Learning basic about parallel an concurrent programming.</i> - <i>Develop algorithmic thinking and skills using one or more processors for multiple processes.</i>
7.2 Specific course objectives	<ul style="list-style-type: none"> - <i>Knowledge of types of Java Treads and their development methods.</i> - <i>Use of an advanced programming language for implementing the studied methods. explain the importance of exploiting parallelism in programs;</i> - <i>explain fundamental concepts and solutions in concurrent programming;</i> - <i>recognize issues and challenges in developing concurrent programs;</i> - <i>apply common techniques used in implementing concurrent programs;</i> - <i>describe shared memory and message passing approaches to parallel programming;</i> - <i>write a program using features of a language that supports concurrent programming;</i> <i>and</i> - <i>recognize and apply design patterns for concurrent programming.</i>

8. Course contents

Lectures	Didactic methods used	Observații
<ol style="list-style-type: none"> 1. Introduction to mobile device programming 2. Differences between standard programming and mobile device programming 3. Programming Android devices, interfaces 4. Programming Android devices, Java mobile specifications. 5. Programming Android devices, using data bases 6. Packaging and distribution of applications (Android Market) 7. Introducing iOS, MacOS 8. Swift language, basics 9. Swift language, services and interfaces 10. Swift language, data bases 11. Cross platforms for mobile devices, comparitions 12. Cross platforms for mobile devices, developing software 13. Cross platforms for mobile devices, examples 14. Projects 	<p><i>Lecture, discussions, examples</i></p>	<p>On-line, Teams On-line, Teams On-line, Teams On-line, Teams On-line, Teams</p>
<p>References Jakob Iversen, Michael Eierman, Learning Mobile App Development: A Hands-on Guide to Building Apps with iOS and Android, Addison-Wesley Professional, 2013</p>		

Seminars-laboratories	Didactic methods used	
1. Presentation of development environments 2. Access device, orientation, interfaces 3. Android programming 4. Projects 5. Introducing iOS, MacOS 6. Swift programming 7. Projects 8. Cross platforms for mobile devices 9. Projects	<i>laboratory works</i>	On-line, Teams On-line, Teams On-line, Teams On-line, Teams On-line, Teams

9. Corroborating Course content expectations to the epistemic community representatives, professional associations and employers representative for the curricula

- *Not applicable.*

10. Assessment

Activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Percentage from the final mark
10.4 Course	<i>Final evaluation</i>	<i>Final project</i>	50 %
	-	-	-
10.5 Seminar/laboratory	<i>Continuous assessment</i>	<i>Portfolio of laboratory</i>	50 %
10.6 Minimum performance standard: 5.00			

Completion date

23.09.2022
